SQUARE DIFFUSERS

MODELS DF3, DA3 & DF3I 3 CONE

MODEL DF3 - Fixed horizontal pattern

MODEL DA3 - Adjustable horizontal pattern

MODEL DF3I - Fixed horizontal pattern, Insulated

Airvector's 3 Cone Supply Diffusers are recommended for heating, ventilating, and cooling. The DF3's and DA3's integrated round-neck-to-square-face construction can provide a 360° horizontal air diffusion pattern similar to a full round diffuser. The DA3 diffuser allows for independent adjustable horizontal deflection. The DF3I is supplied with R6 insulation and does not include an integrated collar. R4 and R6 are optional for DF3 and DA3.

High diffusion induction rates result in rapid temperature and velocity equalization of the mixed air mass well above the zone of occupancy. Horizontal performance assures confident use of a cooling temperature differential of 30° and greater at a predicted low air motion of 35 fpm in the zone of occupancy. DF3(I) and DA3 Supply Diffusers perform efficiently with air loadings of 6 to 30 air changes per hour (based on a 10 ft. ceiling height), and a sound level range of NC 25 to 35.

Highlights

- Full face 24" x 24" for all neck sizes.
- Full face 12" x 12" for 6" & 8" neck sizes
- Heavy-gauge all-steel construction
- DF3 avail. with 2" collar or 3" telescopic collar (1" standard for DF3 and DA3)
- Powder paint coating - White (Custom Finishes Avail.)
- Matching N4 and N5 OBDs available
- OBD accessible through diffuser face

SQUARE DIFFUSERS

MODELS DF4, DA4 & DF4I 4 CONE

MODEL DF4 - Fixed horizontal pattern

MODEL DA4 - Adjustable horizontal pattern

MODEL DF4I - Fixed horizontal pattern, Insulated

Airvector's 4 Cone Supply Diffusers are recommended for heating, ventilating, and cooling. The DF4's and DA3's integrated round-neck-to-square-face construction can provide a 360° horizontal air diffusion pattern similar to a full round diffuser. The DA4 diffuser allows for independent adjustable horizontal deflection. The DF4I is supplied with R6 insulation and does not include an integrated collar. R4 and R6 are optional for DF4 and DA4.

High diffusion induction rates result in rapid temperature and velocity equalization of the mixed air mass well above the zone of occupancy. Horizontal performances assure confident use of cooling temperature of 30°F and greater at predicted low air motion of 35 fpm in the zone of occupancy. DF4 Supply Diffusers perform efficiently with air loadings of 6 to 30 air changes per hour (based on 10ft. ceiling height), and sound level range of NC 25 to 35.

FEATURES

- Full face 24" x 24" for all neck sizes.
(12" x 12" face available in 3 cone only)
- Heavy-gauge all-steel construction
- DF4 Avail. with 2" collar or 3" telescopic collar
(1" STANDARD FOR DF4 and DA4)
- Powder paint coating - White (Custom Finishes Avail.)
- Matching N4 and N5 OBDs available
- Screw driver adjustment of OBD through diffuser face.

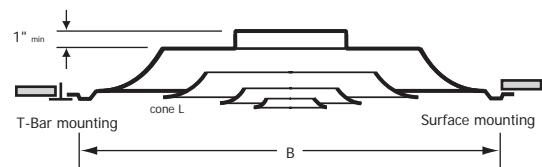

DF4

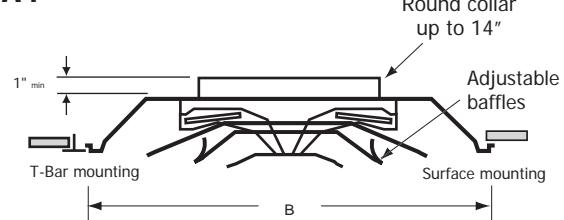

HANDY FEATURES:

- Compatible with Airvector's exclusive Easy Install PF frame
- Core is easily removable without tools to facilitate access to duct
- One standard model suits both T-Bar and Drywall installations using rigid ducts

SERIES DLA, DLAM & DLAI

MODEL SERIES DLA, DLAM & DLAI

Aluminum Louvered Face Diffusers Fixed Directional Pattern, High Capacity

DLA aluminum supply diffusers are recommended for heating, ventilating and cooling.

Designed for high capacity, Airvector®'s Model Series DLA can supply large volumes of air at low sound levels and pressure drops. DLA directional diffusers are offered in all standard square dimensions with a variety of cores to provide any required air pattern.

DLA Series feature a square neck, **DLAM** Series feature a round neck and **DLAI** Series feature an R6 insulated back, pre-scored for 6"-14" round collars.

Core is removable to facilitate access to duct.

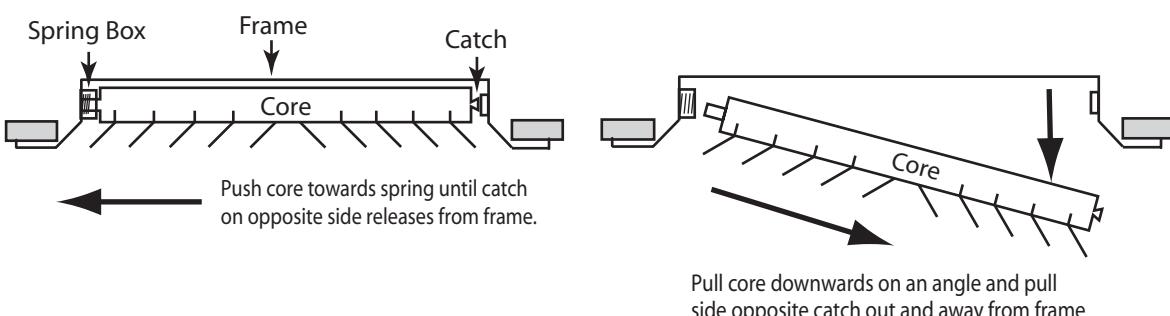

DLA

FEATURES

- Full Face 12"x12", 15"x15", 18"x18", 21"x21" and 24"x24"
- 1 Way, 2 Way Opposed, 2 Way Corner, 3 Way or 4 Way
- Commercial-grade aluminum construction

- Core can be easily removed without tools
- Ideal for VAV systems
- Powder paint coating - White

Handy Feature: Boxed-in spring with pressure plate for extra-smooth removal of core.

PERFORMANCE CORRECTIONS FOR RETURN AIR APPLICATIONS

Negative Static Pressure Add 10% to Total Pressure listed for supply.

Noise Criteria Add 1 to NC.

SQUARE DIFFUSERS

MODELS ISO, ISOI ARCHITECTURAL LINE Square Panel Diffuser

MODEL ISO - Round neck

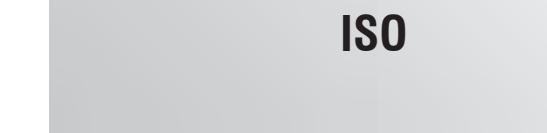

MODEL ISOI - R6 Insulated - Pre-scored for collars

ISO Series supply diffusers are recommended for heating, ventilating and cooling.

The ISO series provide a 360° air diffusion pattern similar to a full round diffuser. High diffusion induction rates result in rapid temperature and velocity equalization of the mixed air mass well above the zone of occupancy. Horizontal performance assures confident use of cooling temperature differential of 30°F and greater, at predicted low air motion 35 fpm in the zone of occupancy. ISO Series supply diffusers perform efficiently with air loadings of 6 to 30 air changes per hour (based on 10 ft. ceiling height), and sound level range of NC 25 to 35.

Features:

- Full face 24" x 24" for all neck sizes. ISO only
- Full face 12" x 12" for 6" & 8" neck sizes. ISO only
- Heavy-gauge all-steel construction.
- Ideal for VAV systems.
- Powder paint coating - White (default) Custom colours avail.
- Matching OBD dampers, NBI baffle, and PF plaster frame available.

ISO

Highlights:

- ISO model suits both T-Bar and Drywall installation using rigid ducts
- Removable core for access to optional damper

Insulation:

ISO - Optional R4 or R6 insulation. R6 fiberglass insulation complies with A.S.T.M. E84 flame and smoke test. Only available on models with 24" x 24" face.

ISOI - R6 fibreglass insulation.

PERFORATED DIFFUSERS

MODELS PSI, PSIL & PRI with R6 Plenum

MODELS PSI & PSIL - Supply Diffusers

PSI Supply Diffusers have high diffusion induction rates resulting in rapid temperature and velocity equalization of the mixed air mass well above the zone of occupancy.

The horizontal performance of their air pattern baffle or optional directional louvers ensure confident use of cooling differentials of 25° F and greater, at predicted low air motion 35 fpm in the zone of occupancy.

PSI Supply Diffusers perform efficiently with air loadings of 1 to 3 cfm per square feet of floor area, or 6 to 20 air changes per hour (based on 10 ft. ceiling height) and sound level range of NC 25 to 35.

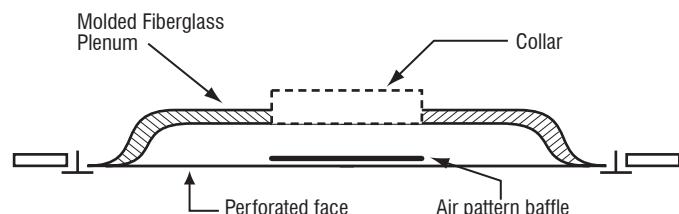

**PSI
PSIL
PRI**

MODEL PRI - Return Diffusers

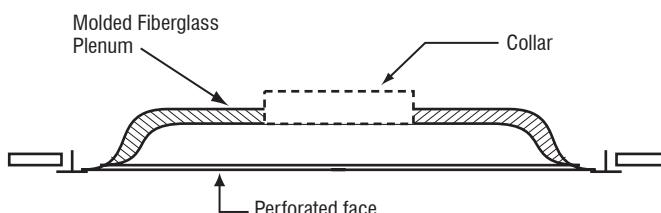

PRI Return Diffusers are similar to PSI but with the air pattern baffle removed. They are matched in appearance.

FEATURES

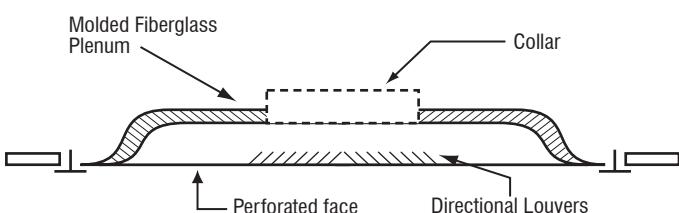

- Heavy gauge all steel construction.
- 24" X 24" face for neck sizes 6"-8"-10"-12"-14" D.
- Compatible with VAV Systems.
- Powder paint coating - White.
- Holes are $\frac{3}{16}$ " D. staggered $\frac{1}{4}$ " affording 53% free area.

CEILING RETURNS

EGGCRATE-ER SERIES

Series **ER** grilles and registers have grid cores capable of transferring or returning high air volumes with minimum air pressure loss. They match in appearance grid louvers on luminaires. Models **ERT** - **ERU** - **ERN** fit lay-in tee bar openings in suspended grid ceilings. Model **ERI** comes with fibreglass back panel and Model **ERM** comes with a steel back panel. Both **ERI** and **ERM** fit lay-in tee bar openings. Model **ERE** is the matching return grille. It fits overlap openings in solid ceilings and walls.

FEATURES

All Aluminium grilles

- Grid is $1/2"$ x $1/2"$ x $1/2"$.
- Frame is of extruded aluminium.
- Suitable for T-bar installations (Overall size = Listed size - $1/4"$).

Model **ERT** (fig. 1) with $1\frac{1}{4}$ " wide "L" frame.

Model **ERU** (fig. 2) with "U" frame.

Model **ERN** (fig. 3) $1/2"$ x $1/2"$ x $1/2"$. Aluminium core only.

Custom Sizing Available.

Model **ERN1** (fig. 3) $1/2"$ x $1/2"$ x $1"$. Model **ERN111** (fig. 3)

$1"$ x $1"$ x $1"$. Aluminium core only. Fixed Sizes Only.

Model **ERI** (fig. 4) aluminium core with molded fiberglass back and aluminium foil vapor barrier scored for 6" to 14" D.

Model **ERM** (fig. 5) aluminium core with steel back panel.

- Suitable also for overlap installations, including drywall. (Collar size = Listed duct size - $1/4"$).

Model **ERE** return grille (fig. 6) with $1\frac{1}{4}$ " wide margin has countersunk

mounting screw holes as standard feature. (Screws are provided).

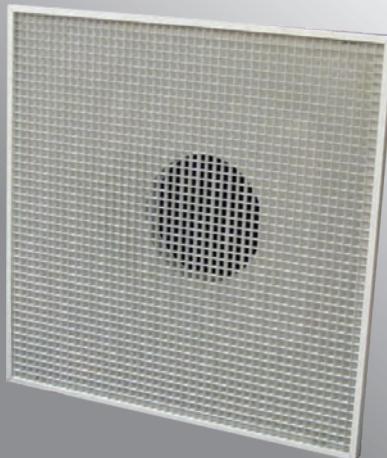

Model **ERE** return grille is available with plaster frame (**ERE-F**) for use as plaster stop or as separate frame to facilitate grille removal.

Plastic grilles

- Model **ERN-P** (fig. 3) with plastic core.
- Grid is $1/2"$ x $1/2"$ x $3/8"$.
- Standard grille and panel sizes:
 $24"$ x $12"$ / $24"$ x $24"$ / $24"$ x $48"$.
Other sizes are available in one piece up to $48"$ x $24"$.

ERT

ERM

Available Dimensions:
ERT, ERU, ERN, ERE

MIN. W X H	MAX. W X H
$6"$ x $4"$	Any even dimension up to $48"$ x $24"$
$2"$ increments of width and height.	
Multiple sections furnished for sizes greater than maximum width and height.

FOR T-BAR LAY-IN INSTALLATION

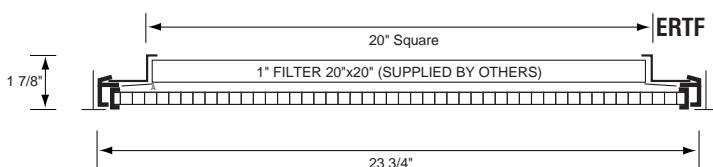

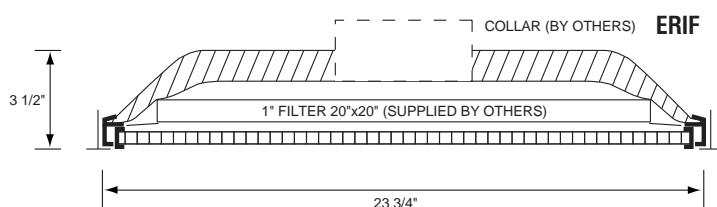

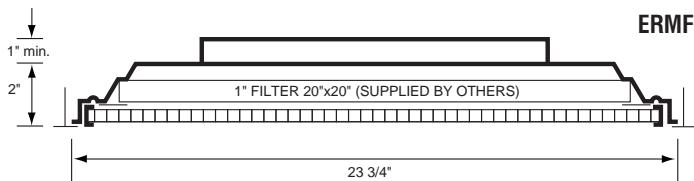

Series **ER** filter grilles have grid cores capable of transferring or returning high air volumes with minimum air pressure loss. They match in appearance grid louvers on luminaries.

The core consists of a 1/2" x 1/2" x 1/2" aluminum grid in a sturdy extruded aluminum U frame which swings in or out of the fixed back pan for easy access to the 1" standard filter or filter media (supplied by others). Two locking arms opposite to the two concealed hinges provide secure locking of the core in an unobtrusive manner.

Model **ERMF** has steel back pan with heavy gauge steel reinforcing corners equivalent to 18 ga. so as to minimize damage due to handling.

Model **ERIF** has an insulated back pan consisting of a fixed extruded aluminum frame and a molded fiberglass pan suitable for round duct connections up to 14" D. and scored for easy cutting of collar opening. This model has all aluminum metal components with sturdy corners so as to minimize damage due to handling .

Model **ERTF** has a square filter frame to accomodate 20" x 20" filters and ducts of the same listed size. This model has sturdy corners so as to minimize damage due to handling.

 **AIRVECTOR®**

ERMF

ERIF

ERTF

PLASTIC EGG CRATES

All grilles are available with plastic core.

Please specify by adding suffix "P".

Example: ERMF-P, ERIF-P, ERTF-P etc.

Plastic grid is 1/2" x 1/2" x 3/8".

HOW TO ORDER

M	For metal back pan	ER M F - P	24 08
I	For molded f. glass back pan		Collar Size
T	For rectangular duct connection	24" x 24"	Face Size
		For plastic core add suffix "P"	

LANCED
FACE

FILTER GRILLES

MODELS LRMF-LRIF-LRTF

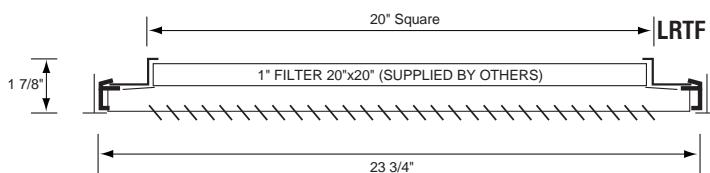

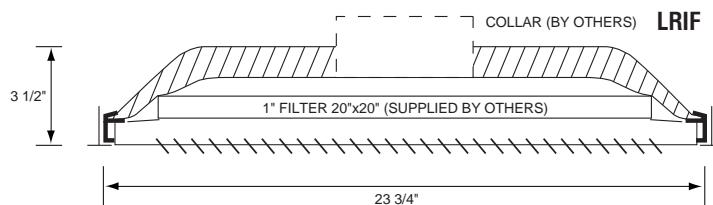

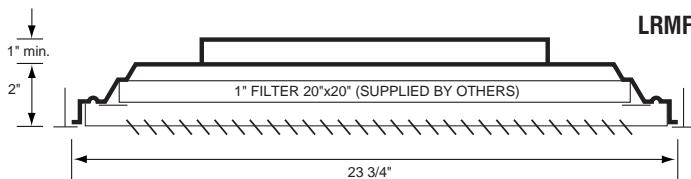

FOR TEE BAR LAY-IN INSTALLATIONS

Series **LR** filter grilles have their face lanced with rows of fins capable of transferring or returning high air volumes with minimum air pressure loss. The fins are set at 40° and spaced 1/2" apart. The face swings in or out of the fixed back pan for easy access to the 1" standard filter or filter media (supplied by others). Two locking arms opposite to the two concealed hinges provide secure locking of the face in an unobtrusive manner.

Model **LRMF** has steel back pan with heavy gauge steel reinforcing corners equivalent to 18 ga. so as to minimize damage due to handling.

Model **LRIF** has an insulated back pan consisting of a fixed extruded aluminum frame and a molded fiberglass pan suitable for round duct connections up to 14" D. and scored for easy cutting of collar opening. This model has sturdy corners so as to minimize damage due to handling.

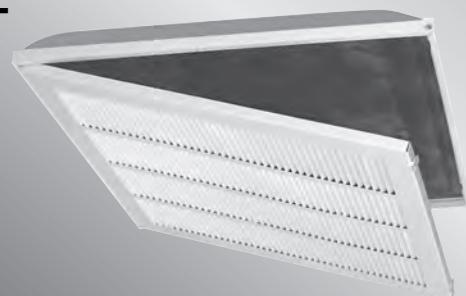

Model **LRTF** has a square filter frame to accomodate 20" x 20" filters and ducts of the same listed size. This model has sturdy corners so as to minimize damage due to handling.

PERFORATED
FACE

FILTER GRILLES

MODELS PRMF-PRIF-PRTF

FOR TEE BAR LAY-IN INSTALLATIONS

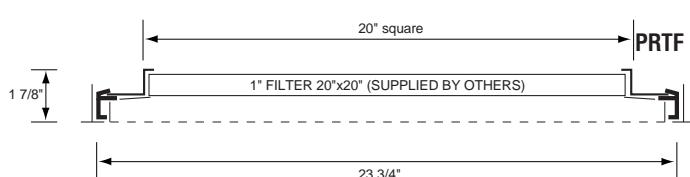

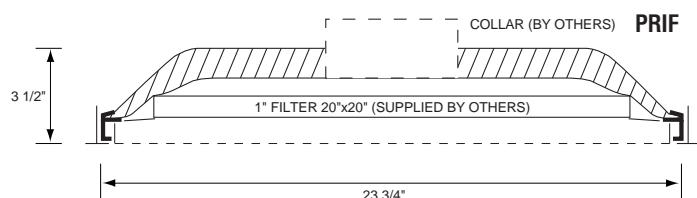

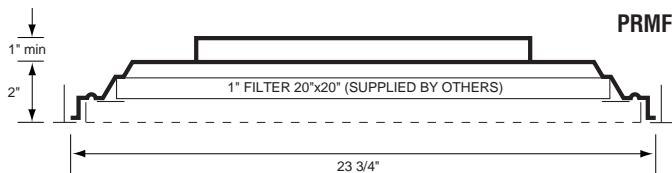

Series **PR** filter grilles match in appearance perforated face supply diffusers series PS.

The grille consists of a heavy gauge steel perforated face with 3/16" D. round holes on 1/4" staggered centers (53% free area) which swings in or out of the fixed back pan for easy access to the 1" filter 20" x 20" (supplied by others). Two locking arms opposite to the two concealed hinges provide secure locking of the grille in an unobtrusive manner.

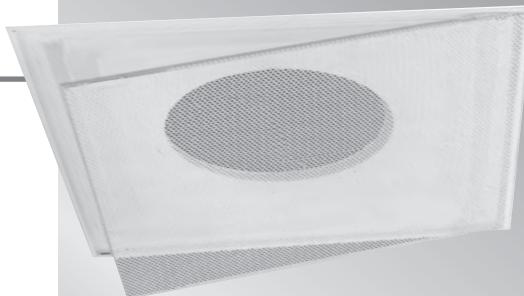

Model **PRMF** has steel back pan with 20" x 20" square filter frame, heavy gauge steel reinforcing corners equivalent to 18 ga. so as to minimize damage due to handling. Extruded round collars will accommodate ducts 6", 8", 10", 12" & 14" D.

Model **PRIF** has an insulated back pan consisting of a fixed extruded aluminum frame and a molded fiberglass pan suitable for round ducts connections up to 14" D. and scored for easy cutting of collar opening. The extruded aluminum frame has sturdy corners so as to minimize damage due to handling.

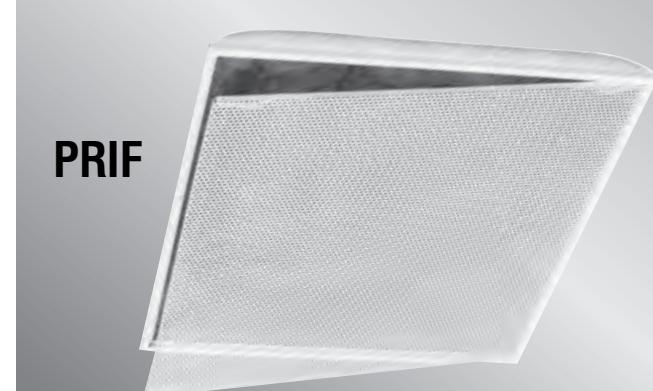

Model **PRTF** has a square filter frame to accomodate 1" filters 20" x 20" and ducts of same listed size. The extruded aluminum frame has sturdy corners so as to minimize damage due to handling.

GRILLES & REGISTERS

	ALUMINUM	STEEL
MODELS	GAA1 GAA2 GAA4	GSA1 GSA2 GSA4
		supply, single deflection supply, double deflection return, single row fixed 45 degree

FRONT ROW BLADES DIRECTION:

Parallel to width, (default) or add suffix H
Parallel to height, add suffix V

DAMPERS:

Grilles (no damper)
Register (with damper):
For registers with steel opposed
blade damper: add suffix 7

Single deflection supply grilles and registers are recommended for applications requiring pattern adjustability in a single horizontal or vertical plane, sill or sidewall location at ceiling line, or heating application only.

Double-deflection supply grilles and registers are recommended for application in systems requiring optimum flexibility of pattern change to accommodate changing job conditions.

The combination of streamlined foil shaped bars and 17 mm (2/3-inch) bar spacing maintains a high effective area capacity of greater than 80% which minimizes outlet velocity, reduces pressure drop and assures quiet operation. Individually adjustable bars are capable of shortening throw up to one-half with a wide spread deflection requiring only a 20% increase in outlet velocity at a fixed volume.

GAA Series (aluminum) have extruded aluminum frame with roll formed aluminum bars.

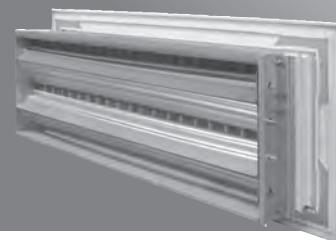

GSA Series (steel) have extruded aluminum frame with steel bars. This unique feature combines the beauty and rust resistance of the aluminum frame with the rigidity of steel bars.

ENGINEERING PERFORMANCE DATA

SUPPLY AIR GRILLES AND REGISTERS

Single and Double Deflection adjustable Type - Series GSA & GAA

THROW FACTORS

Throw values (T) in Table 1 are based on a Terminal Velocity (V_T) of 75 fpm. Throw values at other terminal velocities (V_T 50 to V_T 150 fpm) are established by multiplying throw (T) in table 1 by Throw Factor in table below.

Multiply Throw (T) in Table 1 by Factor				
VT (fpm)	50	75	100	150
Throw factor	x 1.5	x 1.0	x .76	x .5

Grille sound ratings will be increased by integral or localized air volume dampering, by non-uniform air flow in the grille collar and by the addition of inherent system noise.

REGISTER THROTTLING CORRECTION

Damper throttling effect (excess pressure drop due to part closing of damper)	Press. Drop In. H ₂ O		
	.05"	.05"	.05"
Approximate damper opening	3/4	2/3	1/2
NC addition to single outlet sound rating	5	10	15

Damper throttling effect = excess pressure drop created by partially closing the register damper.

NC addition to be added to NC values of table 1.

Performance of any size not shown in the tables will be the same as for the size shown with the same listed size area.

EXAMPLE:

A 36 x 16 size (not shown) has a listed area of 576 sq. in. Its performance will be identical to a 24 x 24 size (shown) which has the same listed size area of 576 sq. in.

Single and Double Deflection adjustable Type - Series GSA & GAA

Total air drop from sidewall outlet

The drop of an air stream varies directly with cooling temperature differential, throw and inversely with outlet velocity (V_k). The total drop of a cooled air stream is tabulated for two typical conditions of cooling temperature differentials and a range of throws and outlet velocities.

TOTAL AIR DROP

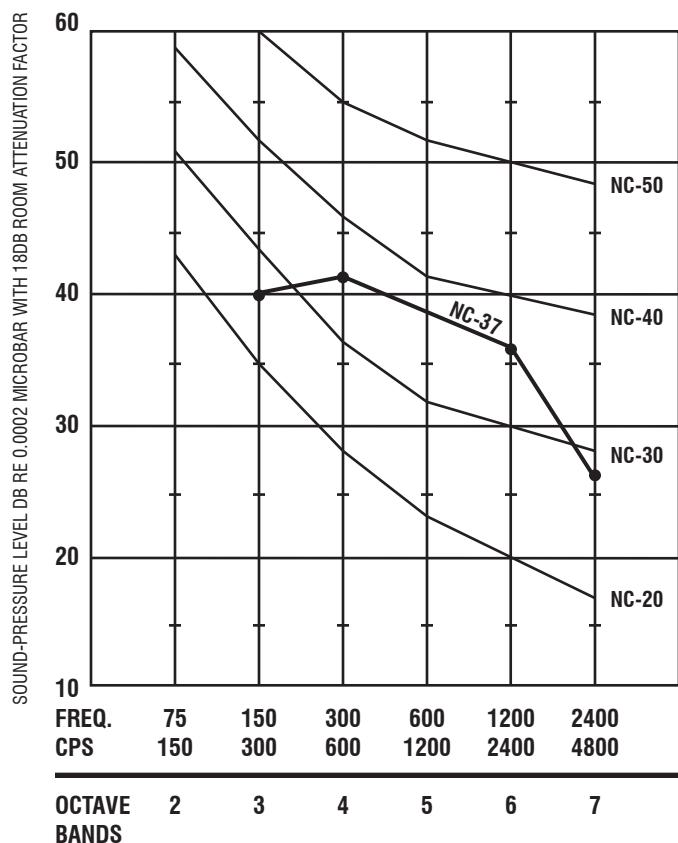

DROP DUE TO SPREAD + DROP DUE TO COOLING TEMPERATURE DIFFERENTIAL

RECOMMENDED NC CRITERIA

NC Curve	Communication Environment	Typical Occupancy
Below NC 25	Extremely quiet environment, suppressed speech is quite audible, suitable for acute pickup of all sounds.	Broadcasting studios, concert halls, music rooms.
NC 30	Very quiet office, suitable for large conferences; telephone use satisfactory.	Resistances, theatres, libraries, executive offices, directors' rooms.
NC 35	Quiet office; satisfactory for conference at a 15 ft. table; normal voice 10-30 ft.; telephone use satisfactory.	Private offices, schools, hotel rooms, courtrooms, churches, hospital rooms.
NC 40	Satisfactory for conferences at a 6-8 ft. table; normal voice 6-12 ft.; telephone use satisfactory.	General offices, labs, dining rooms.
NC 45	Satisfactory for conferences at a 4-5 ft. table; normal voice 3-6 ft.; raised voice 6-12 ft.; telephone use occasionally difficult.	Retail store cafeterias, lobby areas, large drafting & engineering offices, reception areas.
Above NC 50	Unsatisfactory for conferences of more than two or three persons; normal voice 1-2 ft.; raised voice 3-6 ft.; telephone use slightly difficult.	IBM rooms, stenographic pools, print machine rooms, process areas.

SLOT DIFFUSERS

ALS SERIES SLOT DIFFUSER

For Ceiling, Sidewall and Sill Installation

Series **ALS** Architectural Linear Slot Diffusers are designed for installation in the ceiling, sidewall or sill and are recommended for supplying heated, ventilated or cooled air and for returning or exhausting room air. Air pattern directional changes through 180° are effected by the integral "Uniflex" combination pattern and volume controller, permitting pattern adjustment to meet changing requirements. Their reliable performance assures confident use of cooling temperature differentials up to 25°F at predicted low air motion 35 FPM in the zone of occupancy. Series ALS Supply Diffusers perform efficiently with air loadings of 1 to 3 CFM per square feet of floor area or 6 to 18 air changes per hour (based on 10ft. ceiling height) at a sound level range of NC 25 to 35.

When installed in the ceiling, Series ALS Diffusers provide a horizontal air path that is adjustable through 180° in each slot opening. One to ten slot ALS Diffusers can be adjusted to provide one-way or two-way air patterns by directing the controller as required to either side.

Vertical downward air pattern can be adjusted from all slots. A combination horizontal pattern and vertical down pattern can be effected from a two (or more) slot diffuser.

Series ALS diffusers are fabricated of high-quality aluminum extrusions. The pattern controller is coated dull black to accent the slot opening. Components are mechanically interlocked together for a blemish-free appearance. Keyways and splice plates facilitate sections over 72" to form continuous lengths. Ninety degree mitered corner sections are furnished in one piece.

Concealed mounting brackets fit in a hemmed duct collar to positively hold the diffuser in ceiling and sidewall installations. Series ALS diffusers used for return or exhaust air are identical to supply sections except the pattern controller is removed to increase air capacity.

The Airvector® exclusive UNIFLEX pattern and volume controller

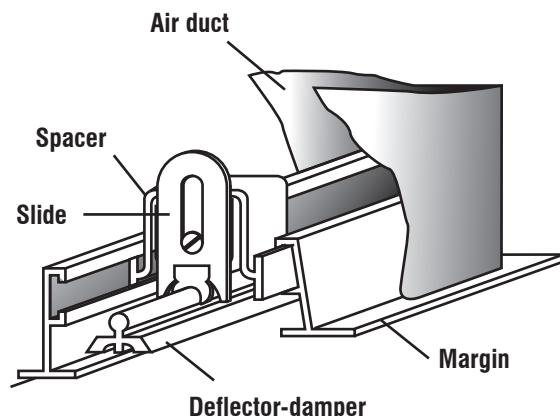

ALS37

FEATURES

- THREE SLOT SIZES, 1/2", 3/4" and 1".
- ONE TO TEN slots wide for air volume of 10-350 CFM per foot.
- EXTRUDED ALUMINUM construction: mechanical assembly.
- White powder paint finish-standard.
- OVERLAPPING OR T-BAR MARGINS.

ACCESSORIES

- Mitered Corner Sections
- AVAILABLE BUTTS in continuous lengths with key-way splices. Factory cut or field cut lengths for precise installation.
- 180° "UNIFLEX" ADJUSTABLE PATTERN AND VOLUME CONTROLLER provides positive positioning, constant static pressure, constant outlet area.

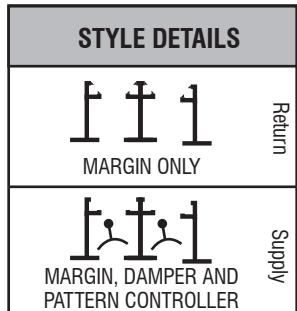

ARCHITECTURAL STYLES

ALS SERIES SLOT DIFFUSER

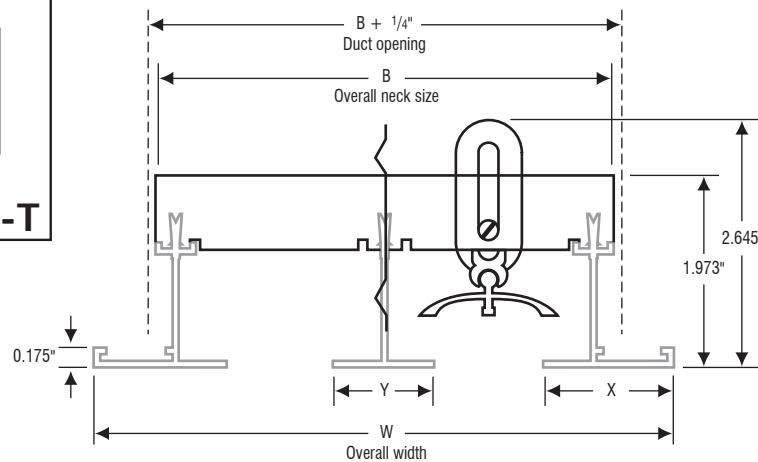

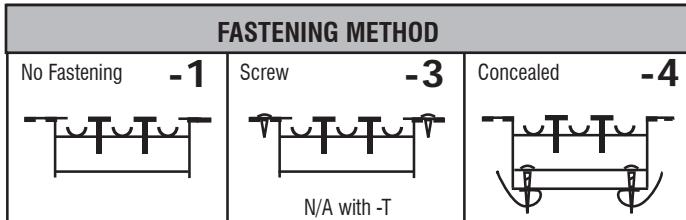

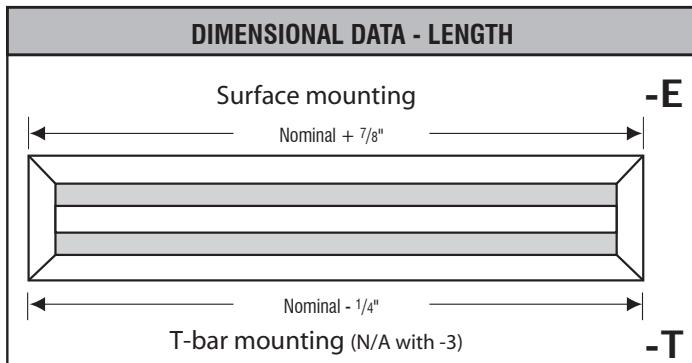

LISTED SIZES AVAILABLE	
Any fractional inch increment of length 12" to 72"	
One to ten slots	
Lengths longer than 72" will be furnished in multiple sections for field butting.	
Custom Paint - Lengths over 60" will be furnished in multiple sections

ENGINEERING PERFORMANCE DATA

ALS17 1" SLOT SUPPLY DIFFUSER

NOTES:

- a. Table 1 based on 4 ft. diffuser length. For longer lengths, correct throw and NC per Table 2.
- b. For 2-way ceiling throw, proportion (CFM) and number of slots in each direction of T and select from 1-way data, Table 1.
- c. When using continuous diffuser lengths with alternating active and inactive sections, a reduction in throw can be obtained by omitting the factors contained in Table 2.

- d. P_s constant for horizontal 1-way, 2-way and vertical pattern adjustment.
- e. Supply air temperature effect on horizontal throw is shown in Table 3. Vertical throw at varying supply air temperatures is shown in Table 4.
- f. Terminal velocities (V_T) at the minimum and maximum Throw (T) positions are rated at 150 FPM and 100 FPM respectively with corresponding room velocities (V_R) of 50 FPM and 35 FPM.

TABLE 2 CONTINUOUS DIFFUSER LENGTH FACTORS

Modify Table 1 by factors for diffuser lengths above 4ft.				
Diffuser Length	Throw (T)			NC
	Ceiling Min.-Max.	Sidewall Min.-Max.	Sill Min.-Max.

ENGINEERING PERFORMANCE DATA

ALS27 1/2" SLOT SUPPLY DIFFUSER

NOTES:

- a. Table 1 based on 4 ft. diffuser length. For longer lengths, correct throw and NC per Table 2.
- b. For 2-way ceiling throw, proportion (CFM) and number of slots in each direction of T and select from 1-way data, Table 1.
- c. When using continuous diffuser lengths with alternating active and inactive sections, a reduction in throw can be obtained by omitting the factors contained in Table 2.
- d. P_s constant for horizontal 1-way, 2-way and vertical pattern adjustment.
- e. Supply air temperature effect on horizontal throw is shown in Table 3. Vertical throw at varying supply air temperatures is shown in Table 4.
- f. Terminal velocities (V_T) at the minimum and maximum Throw (T) positions are rated at 150 FPM and 100 FPM respectively with corresponding room velocities (V_R) of 50 fpm and 35 FPM.

TABLE 2 CONTINUOUS DIFFUSER LENGTH FACTORS

Modify Table 1 by factors for diffuser lengths above 4ft.				
Diffuser Length	Throw (T)			NC
	Ceiling Min.-Max.	Sidewall Min.-Max.	Sill Min.-Max.
