

It's not always the case,
but sometimes,
less IS more.

QUALITYFLOW 4"

MAXIMUM VALUE

The ultra compact Quality Flow is the all-in-one "Super Tool" of air filters. A 4" deep Quality Flow replaces virtually every type of 12" deep MERV 11 to MERV 14 rigid filter at a lower price and better pressure drop. And yes, it will last at least as long and withstand almost any conditions. Consider the ease of ordering, stocking and handling by switching to the one, compact filter that does it all.

THINKSIMPLE. THINKSMART. THINKQUALITY.

QUALITYFLOW 4"

THINKSIMPLE. THINKSMART. THINKQUALITY.

Quality Flow filters almost always ship within a week and are available in custom sizes. Ask about the 12" deep Quality Flow if you want even lower airflow resistance and twice the service life. When you combine price, energy savings, shipping and labor savings, the Quality Flow filter can't be beat!

It all adds up to the best little filter on the market.

* Airflow for MERV 13 efficiency at 492 FPM.
