Discover Airvector®

Airvector® products are manufactured by Alfa Mega Inc., a family owned business based in Montreal, Canada. We are proud to offer quality products with many exclusive features.

It is however our exceptional level of service that makes us so unique. From customer service to production, we will always do our best to become and remain your most dependable supplier of Grilles, Registers and Diffusers.

If you already dealt with us you know what we're talking about. If not, it might be time for you to try us out!

We use powder coated painting on all our products to ensure scratch resistance and the best quality finish.

Some Exclusive Features

GSA

Our steel grilles are in fact a hybrid model. This Airvector® exclusive design combines the beauty and rust resistance of the aluminum frame with the rigidity of steel fins, resulting in a cost-efficient and appealing product.

Linear Slot Diffusers

Save precious installation time with our exclusive concealed fastening method.

Also, our pattern control damper offers a performance equivalent to the well-known 'ice tongue' while allowing much more flexibility in air flow adjustment.

Plaster Frame

Our unique Plaster Frame offers a brand new experience for installers.

And More...

Ship and stock diffusers with 1" collar and pull it out to 3" before installation. Our Telescopic Collar option is cost-efficient and convenient.

Our exclusive NBI baffles for Plaque Diffusers offer better performance, light speed installation and flexibility like no other baffles on the market.

Save time and money, thanks to our ceiling filter returns with round collars.

Interested in Curved Blade Grilles? Have a look at our exclusive GCR model with recessed blades.

Truly Dependable
