

KAROO

The KAROO is a Drain Pan Pump which turns on to remove the defrost water from a refrigeration cabinet, or condensate water from an air conditioner.

The water level is measured by a sensitive electronic sensor and this controls the operation of the pump via the fully-encapsulated circuitry.

Technical Data:

Voltage:	110 - 120 V, 60 Hz 208 - 240 V, 60 Hz
Power:	30 W pump running, 0.33 W pump off
Discharge head:	19.50 ft ↑, 100 ft →
Water temperature:	104 °F max.
Thermal protection:	cut-out 122 °F

Description	Voltage	Part No.
KAROO-230-UL	208 - 240 V	4679063
KAROO-115-UL	110 - 120 V	4679071
