* Fan-only function

* Integrated handles

* Filter change reminder

* Compact design

* Equipped with the newest in safety standards

LIMITED WARRANTY 5 years

Adjust Settings From Almost Anywhere

How The DH75 & DH100 Works:

As the integrated fan pulls air through the DH75 and DH100 (with a MERV11 filter), moisture and harmful particulates are removed to provide drier, healthier, and more comfortable air to you and your family.

Maintenance:

Maintenance of your new GeneralAire® Dehumidifier is minimal:

• Replace the MERV 11 pleated filter once every 6 months.
• Replace with only GeneralAire® brand replacement filters.
    • DH75 Filter GFI #7143 / DH100 Filter GFI #7144.
• Do not operate your dehumidifier without a filter.

Install A Dehumidifier In Your Home To:

Protect Your Family's Health:

Studies have shown that long-term exposure to mold and mildew can become a serious health problem. Reducing moisture reduces the occurrence of mold and mildew. Drier air can help to minimize conditions to which insects and dust mites are drawn and alleviate causes of allergy and asthma symptoms.

Save Money On Energy Bills:

Moist air can feel heavy and hot. Drier air feels cooler. Reduce moisture, feel more comfortable at a higher air conditioner setpoint during summer months.

Clean Up Water Damage:

A dehumidifier can be a valuable part of a comprehensive water damage cleanup plan.

Why A Whole-House Unit?

• Treats Your Whole House 24 / 7 / 365
• Requires Minimal Maintenance
• Out of Sight
• Quiet
